

MANIKYA PRASAD KOUNDINYA ATCHYUTUNI

github.com/koundinyaatchyutuni | leetcode.com/u/Koundinyaatchyutuni

Email : koundinyaatchyutuni@gmail.com

Mobile : 9393930903

SKILLS

- **Programming Languages:** C++, Java, Python, JavaScript, C
- **Frontend:** React.js, HTML5, CSS3, Vite
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Axios
- **AI & Agentic AI:** LangChain, LangGraph, LLMs, RAG, Prompt Engineering, Tool Calling, AI Agents
- **Databases:** MongoDB, MySQL
- **Developer Tools & DevOps:** Git, GitHub, GitHub Actions, CI/CD, Linux, Shell Scripting (Bash), Visual Studio Code (VS Code)
- **Cloud:** Google Cloud Platform (GCP), Bigquery, GCP Composer, GCP Dataproc, Google Cloud Storage (GCS)
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, Basics of System Design

ACADEMIC AND EXTRACURRICULAR ACHIEVEMENTS

- [Gate 2024 DA Rank \(General\): 353](#), [APEAMCET Rank \(General\): 1802](#), [JEE Mains 94.5](#) percentile
- Achieved a **1700+ contest rating** and **solved 750+** Data Structures & Algorithms problems on [LeetCode](#).
- Google cloud certified **Cloud digital leader**
- Short clip making: **Winner in short clip-making competition**, focused on promoting cleanliness, GVPCE.

WORK EXPERIENCE

Accenture Nov'24 - Present

Advanced Associate Software Engineer | Data Engineer

- Contributed to the migration of legacy data pipelines for the **American Express** cloud modernization project by redesigning data workflows on **Google Cloud Platform (GCP)** using **BigQuery**, **Cloud Dataproc**, and **Cloud Composer**.
- Developed and maintained **Apache Airflow** DAGs with complex workflow orchestration, dependency management, scheduling, retry mechanisms, and monitoring to automate large-scale data processing.
- Optimized **BigQuery** SQL workloads for efficient data transformation and implemented secure handling of sensitive data using **PII masking**, access control, and data governance best practices.
- Developed a **HiveQL-to-BigQuery agent** as part of an **Agentic AI-based automatic code converter**, automating conversion of legacy HiveQL queries to BigQuery SQL.

ScoraLabs May'23 - Jul'23

ML Engineer | Intern

- Fine-tuned the **T5-base Transformer model** using the Hugging Face Transformers library to generate contextually relevant questions from user-provided topics, improving **NLP based question generation**.
- Built an end-to-end **Generative AI** application using Python, integrating the fine-tuned model with a **Flask** web application to provide real-time question generation through a user-friendly interface.
- Performed model training, inference optimization, and **API** integration, enabling seamless interaction between the frontend and the NLP model while enhancing overall user experience.

PROJECTS

Ischeduler | MERN | React | Node | Express | Mongo [\[code\]](#)

- Developed and deployed a **full-stack MERN task scheduling application** featuring secure **JWT authentication**, email **OTP verification**, and recurring task management with a responsive React.js frontend.
- Designed and implemented **RESTful APIs** using **Node.js**, **Express.js**, and **MongoDB**, supporting CRUD operations, encrypted user data storage, user profile management, and schedule persistence.
- Engineered a **recurring reminder system** that processes daily schedules, generates reminder jobs, and sends automated email notifications using **Node Schedule**, **Nodemailer**, and **MongoDB**.
- Deployed on **Render** with **MongoDB Atlas**, configuring CORS, environment variables, and production backend services.

Seat Allocator | Node.js | Express | MongoDB | JavaScript | HTML | CSS [\[code\]](#)

- Developed a **full-stack seat allocation system** that assigns college seats based on student ranks and ordered college preferences using an automated allocation algorithm.
- Designed and implemented **RESTful APIs** using **Node.js** and **Express.js** for student registration, preference submission, and seat allocation workflows.
- Built a **MongoDB-backed** data model to efficiently manage student records, college information, and allocation results.

EDUCATION

Gayatri Vidya Parishad College of Engineering, Vizag 2020 - 2024

CSD | C.G.P.A.: 8.9

Narayana Junior College, Guntur 2018 - 2020

Intermediate, MPC, C.G.P.A.: 9.23

Vanaja Chandra Public School, Gudavalli 2017 - 2018

SSE (Class Xth), C.G.P.A.: 9.8
